## Academic Lecture Comprehension 1 Vocabulary List One: Units Two, Four, and Five 2000 word level

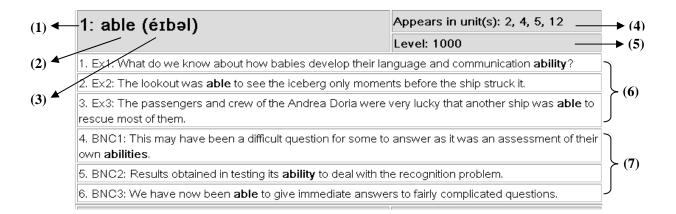

## Overview

This vocabulary list covers important words from your course textbook, *Academic Lecture Comprehension*. All the words in the list are included in the most frequent 2000 words of English. You will certainly see these words in everyday English many times, and for this reason you should study them well. At first sight, you may think that most of the words are 'easy,' because you will have probably studied them before at junior or senior high school. However, the words in the list are used in many different and sometimes unusual ways. Therefore, you should carefully study how to use the words in their different forms, and also what other words appear with them. For example, look at the following sentence:

The lookout was **able** to see the iceberg only moments before the ship struck it.

The keyword here is *able*. You will also see that *able* appears with *to* in the phrase **able to <VERB>**. This is the kind of pattern that you should be looking for when studying the words.

## Key to Vocabulary List entries

- (1) entry number
- (2) keyword
- (3) IPA pronunciation
- (4) units/(chapters) in which the keyword appears
- (5) keyword level (1st 1000 words of English / 2nd 1000 words of English)
- (6) examples of keyword in the textbook. Common words that appear with the keyword are marked in *italics*.
- (7) examples of keyword from the British National Corpus (BNC). This is a huge database of British newspapers articles, magazine articles, television reports, and so on. Common words that appear with the keyword are marked in *italics*.

1: able (éɪbəl)	Appears in Chap(s): 2, 4, 5, 12, 13
	Level: 1000
1. Ex1: What do we know about how babies develop their language and <i>c</i>	ommunication ability?
2. Ex2: Well, we know babies are <b>able</b> to <i>communicate</i> as soon as they ar	e born even before they learn to speak their first language.
3. BNC3: Results obtained in testing its <b>ability</b> to <i>deal</i> with the recognition	problem.
4. BNC4: However, your local council <i>will</i> be <b>able</b> to tell you if you are eligi	ble and provide you with an application form.
2: actual (æktʃəwəl)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: An English speaking child might say something like "Daddy, up" wi	hich <b>actually</b> could mean "Daddy, pick me up, please."
2. BNC2: Video-recording can make use of tape, film or discs for the actua	I storage of the <i>recorded</i> material.
3. BNC3: The first statement gives no indication of what the subroutines a	t 500 and 800 <b>actually</b> <i>do</i> .
4. BNC4: Conservationists claim that unless the deal is <b>actually</b> signed a r	new owner may not feel bound by it.
3: address (æduès)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: When a packet reaches a router, the router reads its destination a	ddress.
2. Ex2: Along the way, many postal agents may look at the <b>addresses</b> on to reach their destination.	the postcards in order to decide the best route to send them off o
3. BNC3: The <b>address</b> <i>book</i> is an odd addition, given that the database is	perfectly adequate for fulfilling this need.
4. BNC4: Manufacturers usually provide relative <i>record</i> addressing which	carries out these calculations for the user.
4: adult (ədált)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: Now, think about some of the similarities and differences involved	in the processes of child and <b>adult</b> language learning.
2. BNC2: In the wild such behaviour would normally never occur because	of the large size of each <b>adult</b> <i>cat</i> 's territory.
3. BNC3: Young adulthood was defined as between 18 and 30 years of ag	le.
4. BNC4: If you give your teenage son or daughter a sense of responsibilit	y, they are likely to become <i>responsible</i> adults.
5: age (éɪʤ)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Then, between two and three <i>years</i> of <b>age</b> , young children begin to	o learn more and more grammar.
2. Ex2: Then, around four months of <b>age</b> they begin to babble.	
3. BNC3: Wide <b>age</b> and ability <i>range</i> means younger children may learn fr	om older.
4. BNC4: Six women and 13 <i>men</i> with <b>ages</b> ranging from 14 to 66 years.	
6: agent (éɪʤənt)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Along the way, many postal <b>agents</b> may look at the addresses on t to reach their destination.	the postcards in order to decide the best route to send them off c
2. BNC2: Most large commercial corporations and government agencies h	ave assembled sets of tables of this kind.
3. BNC3: Hence consent to use a shop as an <i>estate agency</i> may well pred	clude its being changed to any other office use.
4. BNC4: The crucial choice of an estate agent raises the question of whe	ther one is necessary at all.
7: ago (əgóʊ)	Appears in Chap(s): 2, 13, 14
	Level: 1000
1. Ex1: Over 2,000 years <b>ago</b> , many rich Romans did the same thing.	
2. BNC2: The first men might then have walked the Earth 130 <i>million</i> years	s ago.
3. BNC3: Obviously we cannot know the outcome of a new project, so let's	
4. BNC4: Twelve months <b>ago</b> when Graeme joined us I had hoped that we	

8: agree (əgıí)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Instead, there are dozens of high-level networks, which agree to connect	t with each other.
2. BNC2: You effectively repeat what they have said, agreeing with them, and the	nen tell them what you want and expect and why.
3. BNC3: Nothing in the agreements between Britain and the US justifies this sta	atement.
4. BNC4: Disagreement over how the cuts are to be implemented is also expect	ted.
9: air (é.)	Appears in Chap(s): 2
	Level: 1000
1. Ex1: Rock and ash flew through the <b>air</b> .	
2. BNC2: FIG. 1 TECHNICAL MANUAL GROWTH RATE WITHIN THE NAVAL	AIR SYSTEMS COMMAND.
3. BNC3: Fuel is needed if you want to stay in the air because the Epical engine	es consume fuel at an alarming rate.
4. BNC4: And setting up the sound waves in the <b>air</b> at the other side.	
10: alive (əláɪv)	Appears in Chap(s): 2
	Level: 2000
1. Ex1: These unlucky <i>people</i> were buried <b>alive</b> under the volcanic ash.	
2. BNC2: My real aims were to get through to John and to keep him alive in peo	pple's minds so that he couldn't be forgotten.
3. BNC3: He has pointed out, too, that if life is considered in this light, then some	· · · · · · · · · · · · · · · · · · ·
4. BNC4: I slip through and my senses are immediately <b>alive</b> to a new intensity.	
11: amaze (əméız)	Appears in Chap(s): 4, 5
	Level: 2000
1. Ex1: But, <b>amazingly</b> , <i>there</i> is no one single controlling network at the top.	
2. Ex2: If we stop to think about it, actually it's quite <b>amazing</b> how quickly babies similar the process is for babies all over the world.	s and children all over the world learn their language and how
3. BNC3: Since then the use of these systems has spread <b>amazingly</b> .	
4. BNC4: The other day I watched this character, uncertain whether or not he we	ould be taken, drop instantly into an <b>amazing</b> role.
12: area (éliə)	Appears in Chap(s): 2, 14, 15
	Level: 1000
1. Ex1: Soon archaeologists began to excavate to dig in the <b>area</b> .	
2. BNC2: The main area of concern in such a sociology of the unconscious lies	in the analysis of social control.
3. BNC3: China has now tightened up on the access of social scientists to rural	areas.
4. BNC4: Some of the <b>areas</b> mapped, however, did not feature in the published	material.
13: arrive (за́іv)	Appears in Chap(s): 4, 12
	Level: 2000
1. Ex1: The postcards would probably <b>arrive</b> at different times.	
2. Ex2: How does information that leaves one computer travel through all of thes in a fraction of a second?	se networks, and <b>arrive</b> at its destination, another computer,
3. BNC3: If the goods don't <b>arrive</b> within 28 days or by a specified delivery date,	you have the right to cancel the order.
4. BNC4: There is a necessary compromise which can only be arrived at in the o	context of a particular system.
14: ask (æsk)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: To help you understand this process, I'm going to <b>ask</b> you to think of the	
2. BNC2: You can also record a list of questions to <b>ask</b> at <i>interviews</i> and also m	
	· · ·
3. BNC3: These farmers were then <b>asked</b> <i>what</i> is the most suitable time of day.	

15: baby (béɪbi)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: What do we know about how <b>babies</b> develop their language and co	ommunication ability?
2. Ex2: Well, we know <b>babies</b> are able to communicate as soon as they are	e born even before they learn to speak their first language.
3. BNC3: Dr. Dunn believes it is important to provide positive suggestions t	o your older child about how to handle the new <b>baby</b> .
4. BNC4: When the second <b>baby</b> was born she had felt completely differen	t.
16: background (bǽkgɹàʊnd)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: By the time they are ten months old, however, the babbling of babie	es from different language <b>backgrounds</b> sounds different.
2. BNC2: He decided to test the theory further by examining the backgroun	d of more than 17,000 Scottish-based oil workers.
3. BNC3: You don't need to worry about <b>backgrounds</b> because they can be	e loaded in if you have drawn one earlier.
4. BNC4: The idea is to use music and sound as a <b>background</b> .	
17: bear (béյ)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Well, we know babies are able to communicate as soon as they are	e <b>born</b> even before they learn to speak their first language.
2. BNC2: One of these was the diagrams that <b>bear</b> his <i>name</i> , which are the	e basis of almost every calculation in particle physics.
3. BNC3: At present, bears regularly cross the little-used road at several po	pints.
4. BNC4: He also became very defensive and threatened human visitors in	a way that he had not done before the <i>young</i> were <b>born</b> .
18: beauty (bjúti)	Appears in Chap(s): 2, 15
To: beauty (bjuil)	Level: 1000
1. Ex1: Pompeii was a <b>beautiful</b> city; it was located on the ocean, on the Ba	
2. BNC2: This produces <b>beautiful</b> , presentation-quality calendars by day, w	
3. BNC3: There's no doubt that trees <i>can</i> greatly enhance the <b>beauty</b> of a g	
4. BNC4: The <b>beauty</b> about those days was that you built up suites of softw	-
19: bed (béd)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: For example, children often say such things as "I goed to <b>bed</b> " inste cream."	ead of "I went to <b>bed</b> ," or "I eated ice cream" instead of "I ate ice
2. BNC2: Depth of sleep Many parents say that they think their child wets the	he <b>bed</b> because of being in such deep sleep.
3. BNC3: Waking early in the morning and coming into parents' bed.	
4. BNC4: However, while I was in hospital, I had seen a boy I vaguely knew	v die of leukemia in the <b>bed</b> opposite me.
20: begin (bɪgin)	Appears in Chap(s): 2, 5, 7, 12, 14, 15
	Level: 1000
1. Ex1: The next stage of language acquisition begins around the age of 18	
2. Ex2: Then, around four months of age they <b>begin</b> to babble.	
3. BNC3: The robot business <b>began</b> to <i>look</i> brighter as we built up experier	nce in putting the machines to work.
4. BNC4: Time and time <i>again</i> we would <b>begin</b> the long task of explaining v	who John was and what on earth we were doing.
21: best (bést)	Appears in Chap(s): 4, 8, 13
	Level: 1000
1. Ex1: Along the way, many postal agents may look at the addresses on the to reach their destination.	
2. Ex2: The router then decides the <b>best</b> route to send the packet on its wa	y to its destination.
	-
<ol><li>BNC3: Other issues relate to investigating how this uncertainty information</li></ol>	Un can <b>Dest</b> de presenteu lo the user.

22: birth (b3θ)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: The first stage of language acquisition begins a few weeks after <b>birth</b> .	
2. BNC2: <b>Birth</b> statistics <i>can</i> be expressed by a number of different measures.	
3. BNC3: He referred me to a specialist, and shortly after my <i>twenty</i> -first <b>birthday</b>	/ I went into hospital for tests.
4. BNC4: I was thinking about black holes as I got into bed one night in 1970, she	ortly after the <b>birth</b> of my daughter Lucy.
23: black (blék)	Appears in Chap(s): 2, 14
	Level: 1000
1. Ex1: This <b>black</b> cloud rose high into the sky.	
2. BNC2: FALLING INTO A black hole has become one of the horrors of science	fiction.
3. BNC3: The inaccuracy is possibly due to choosing too high an exposure, so th	nat some <b>black</b> cells are seen as white.
4. BNC4: Professionals will be familiar with the company's black-bodied trade rar	nge.
24: boat (bóʊt)	Appears in Chap(s): 4, 12
	Level: 1000
1. Ex1: Some might go <i>by</i> truck, some <i>by</i> train, some <i>by</i> plane, some <i>by</i> <b>boat</b> .	
2. BNC2: For Bernard, work was a means to an end, be it a fast car a sailing boa	at or a factory offering large-scale employment.
3. BNC3: The weather still held good next day, so we opted for another, shorter,	boat trip, this time out to Kidney Island.
4. BNC4: Sea lions often follow fishing <b>boats</b> and take fish from hooks.	
25: book (búk)	Appears in Chap(s): 4, 8
	Level: 1000
1. Ex1: But finally, after all of the postcards had arrived, your friend would be able	e to put them back in the correct order and <i>read</i> the <b>book</b> .
2. Ex2: Formal language is the kind of language you find in textbooks, reference	books such as encyclopedias, and in business letters.
3. BNC3: The address book is an odd addition, given that the database is perfect	tly adequate for fulfilling this need.
4. BNC4: Neither issue statistics nor the study of date labels in the books record	in-house use, which may often be substantial.
26: bottle (bótəl)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: For example, a baby in an English speaking home may say "baba" for the	e word " <b>bottle</b> " or "kiki" for "cat."
2. BNC2: He may prefer still mineral water to tap water, so a bottle can be kept n	near him.
3. BNC3: This often means that several <b>bottles</b> of <i>medicine</i> will be used in the pro-	ocess of cure.
4. BNC4: Cut the rest of the <b>bottle</b> to such a height that it fits under the water in the	he tank in which it is going.
27: boy (b(i)	Appears in Chap(s): 2
	Level: 1000
1. Ex1: The <b>boy</b> 's name was Pliny the Younger.	
2. BNC2: No one stopped to ask the <b>boy</b> what he wanted, which was to study sci	ience and work in the field of research.
3. BNC3: The rest of the week passed and each day the boy worked just as hard	and just as long, but each day he produced less.
4. BNC4: Twice as many <b>boys</b> than girls are likely to be aggressive with outsiders	s but they equally fight in the home.
28: break (bjéik)	Appears in Chap(s): 4, 14
	Level: 1000
1. Ex1: The data, or information, in an e-mail message, a Web page, or a file is fi	irst <b>broken </b> <i>down</i> into tiny packets.
2. BNC2: But there is no outdoor super-track, and thus no one has tried to break	the world record, for the 1500 metres on one.
3. BNC3: Table 3.2 provides the former, breaking down, into sector groups, the k	key immediate suppliers.
4. BNC4: Naturally broken sequences Record keys often do not start as an unbro	

29: call (kól)	Appears in Chap(s): 5, 7, 10, 13, 14, 15
	Level: 1000
1. Ex1: The speech they produce is <b>called</b> "telegraphic" speech because the l	pabies omit all but the most essential words.
2. Ex2: Scientists <b>call</b> the underwater earthquake a seaquake.	
3. BNC3: With 16 telephone lines, the system can call 150 people, get their re	sponses, and print out a list in under 20 minutes.
4. BNC4: At present, so-called" industrial fishing" accounts for 50 per cent of t	he North Sea catch.
30: cat (kæt)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: For example, a baby in an English speaking home may say "baba" for	the word "bottle" or "kiki" for "cat."
2. BNC2: In the wild such behaviour would normally never occur because of t

50: cup (káp)	Appears in Chap(s): 5
	Level: 1000
<ol> <li>Ex1: For example, if a baby holds up an empty juice cup and says Daddy" or "May I have more juice, Daddy?"</li> </ol>	s "juice," to his father, the baby seems to be saying, "I want more juice,
2. BNC2: During the day she was offered <i>milk</i> in a <b>cup</b> in small quar	ntities with a small portion of food at meal-times only.
3. BNC3: The paper cups preferred by many environmentalists are f	far worse offenders, according to a Canadian study.
4. BNC4: You then go an make a <b>cup</b> of tea whilst the computer rea	ds through all the files until it comes to the one you want.
51: cut (kát)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: First, you would have to <b>cut</b> up each of the pages of the boo	k to the size of postcards.
2. BNC2: <b>Cut</b> the <i>pipe</i> end square using a fine-toothed saw or a <i>pipe</i>	<i>e</i> cutter.
3. BNC3: This cuts down both the necessary search and the numbe	r of candidates found to be allowable.
4. BNC4: Cut the <i>pipe</i> end square using a fine-toothed saw or a <i>pipe</i>	<i>e</i> cutter.
52: dad (dæd)	Appears in Chap(s): 5
	Level: 1000
<ol> <li>Ex1: For example, if a baby holds up an empty juice cup and says Daddy" or "May I have more juice, Daddy?"</li> </ol>	s "juice," to his father, the baby seems to be saying, "I want more juice,
2. Ex2: An English speaking child might say something like "Daddy,	up" which actually could mean "Daddy, pick me up, please."
3. BNC3: Whenever I went home, my mum <i>and</i> dad had asked me	what was being done for John and why there had been no news of him.
4. BNC4: During my wife's pregnancy, I was delighted to be invited t	to a <b>dads</b> -to-be session at our health centre.
53: dark (dójk)	Appears in Chap(s): 2, 10, 15
	Level: 2000
1. Ex1: It was a very large <b>dark</b> cloud.	
2. BNC2: I think Alone In the <b>Dark</b> <i>just</i> happens to be one of those g	james.
3. BNC3: Then two other subjects of the same area, but of different,	darker colours were added.
4. BNC4: In the <b>darkness</b> of the <i>box</i> they would sit quietly and in the	morning would be ringed and released.
54: data (déɪtə)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: The <b>data</b> , or information, in an e-mail message, a Web page	, or a file is first broken down into tiny packets.
2. BNC2: Where sites are distributing the <b>data</b> locally, in <i>whatever</i> for	orm, they must set up their own local registration system.
3. BNC3: Stored <b>data</b> is not" typed", so a" Type mismatch" error is n	ever produced when reading files.
4. BNC4: It is also useful to demonstrate the choice you are given fo	or <b>data</b> entry in many Windows boxes.
55: day (déı)	Appears in Chap(s): 2, 7, 12, 15
	Level: 1000
1. Ex1: The eruption lasted for about three <b>days</b> .	
2. Ex2: One <b>day</b> Pliny was looking up at the sky.	
<ol> <li>Ex2: One <b>day</b> Pliny was looking up at the sky.</li> <li>BNC3: Twice <b>daily</b>, the tide <i>comes</i> in, and each day it will be apprendiced.</li> </ol>	roximately 50 minutes later than the previous day.
<ol> <li>Ex1: The eruption lasted for about three days.</li> <li>Ex2: One day Pliny was looking up at the sky.</li> <li>BNC3: Twice daily, the tide <i>comes</i> in, and each day it will be appresented approximation.</li> <li>BNC4: The rest of the <i>week</i> passed and each day the boy worked</li> </ol>	roximately 50 minutes later than the previous day. d just as hard and just as long, but each <b>day</b> he produced less.
<ol> <li>Ex2: One <b>day</b> Pliny was looking up at the sky.</li> <li>BNC3: Twice <b>daily</b>, the tide <i>comes</i> in, and each day it will be apprended.</li> <li>BNC4: The rest of the <i>week</i> passed and each <b>day</b> the boy worked.</li> </ol>	roximately 50 minutes later than the previous day. d just as hard and just as long, but each <b>day</b> he produced less. <b>Appears in Chap(s): 2, 12, 14</b>
<ol> <li>Ex2: One day Pliny was looking up at the sky.</li> <li>BNC3: Twice daily, the tide <i>comes</i> in, and each day it will be apprended approximate of the <i>week</i> passed and each day the boy worked</li> <li>BNC4: The rest of the <i>week</i> passed and each day the boy worked</li> <li>death (déθ)</li> </ol>	roximately 50 minutes later than the previous day. d just as hard and just as long, but each <b>day</b> he produced less. Appears in Chap(s): 2, 12, 14 Level: 2000
<ol> <li>Ex2: One day Pliny was looking up at the sky.</li> <li>BNC3: Twice daily, the tide <i>comes</i> in, and each day it will be appresented approximation of the <i>week</i> passed and each day the boy worked</li> <li>BNC4: The rest of the <i>week</i> passed and each day the boy worked</li> <li>Catenatic defeet (defeet)</li> <li>Ex1: When the volcano first erupted, many people were able to fleet</li> </ol>	roximately 50 minutes later than the previous day. d just as hard and just as long, but each <b>day</b> he produced less. Appears in Chap(s): 2, 12, 14 Level: 2000 ee the city and to escape <b>death</b> .
<ol> <li>Ex2: One day Pliny was looking up at the sky.</li> <li>BNC3: Twice daily, the tide <i>comes</i> in, and each day it will be apprended approximate the rest of the <i>week</i> passed and each day the boy worked</li> <li><b>56: death (déθ)</b></li> </ol>	roximately 50 minutes later than the previous day. d just as hard and just as long, but each <b>day</b> he produced less. Appears in Chap(s): 2, 12, 14 Level: 2000 ee the city and to escape <b>death</b> . ed sickness <i>rates</i> very well.

57: decide (dɪsáɪd)	Appears in Chap(s): 4, 14
	Level: 1000
1. Ex1: Along the way, many postal agents may look at the addresses on the p to reach their destination.	
2. BNC2: For the first time in decades, the nation has a chance to decide what	<i>t</i> to do with it.
3. BNC3: It will then switch to a new design, which is yet to be <b>decided</b> .	
4. BNC4: It means <b>deciding</b> <i>what</i> you need and how you feel.	
58: depend (dipénd) Appears in Chap(s): 4, 8, 13, 14	
	Level: 1000
1. Ex1: You probably have noticed that people express similar ideas in differer	nt ways, <b>depending</b> on the situation they are in.
2. Ex2: The process <b>depends</b> <i>on</i> routers.	
3. BNC3: In contrast, rich households, which get wood from their own land, de	<b>pend</b> <i>on</i> logs.
4. BNC4: This allows information to be specified which varies depending on th	e context of the message.
59: develop (dɪvéləp)	Appears in Chap(s): 5, 15
	Level: 1000
1. Ex1: What do we know about how babies develop their language and comm	nunication ability?
2. Ex2: What I'd like to talk to you about today is the topic of child language de	velopment.
3. BNC3: The World Health Organisation has called for individual developing a	countries to commit themselves to decade programmes.
4. BNC4: Technological developments have been at a fast pace since the 195	0s.
60: die (dáɪ)	Appears in Chap(s): 2, 12, 13, 15
	Level: 1000
1. Ex1: More than 2,000 <i>people</i> <b>died</b> .	
2. BNC2: Most of the trees affected die within two to three years, while a small	proportion recover.
3. BNC3: His older sister had <b>died</b> at the age of 6 months after an identical clir	ical course.
4. BNC4: Many affected trees have been dying within a year of the condition b	eing detected.
61: difference (dífsəns)	Appears in Chap(s): 4, 5, 8, 10, 12, 14, 15
	Level: 1000
1. Ex1: Another difference between formal and informal language is some of the	ne vocabulary.
<ol><li>Ex2: The best way for a nonnative speaker of English to learn the difference write in <b>different</b> situations.</li></ol>	is to <i>observe</i> the <b>different</b> ways English speakers speak or
write in <b>different</b> situations.	ous ones are likely to be age related.
<ul> <li>write in different situations.</li> <li>3. BNC3: Many of the differences <i>between</i> the findings in this study and previo</li> <li>4. BNC4: Software costs a lot and it should be re-usable across different system</li> </ul>	ous ones are likely to be age related.
<ul><li>write in different situations.</li><li>3. BNC3: Many of the differences <i>between</i> the findings in this study and previous</li></ul>	bus ones are likely to be age related. ems. Appears in Chap(s): 2

64: disaster (dɪzǽstȝ)	Appears in Chap(s): 2, 12
	Level: 2000
1. Ex1: In fact, 18,000 people escaped the terrible <b>disaster</b> .	
2. BNC2: A <b>disaster</b> begun <i>by</i> the telephone will be completed <i>by</i> the	electronic network.
3. BNC3: The <i>project</i> has been <b>disastrous</b> for the bank in terms of put	olic relations, and has divided Bank's own officials.
4. BNC4: A plentiful supply of anything is a recipe for <b>disaster</b> .	
65: doubt (dáʊt)	Appears in Chap(s): 5, 15
	Level: 1000
1. Ex1: I <b>doubt</b> that it was "mama."	
2. BNC2: Often changes are marked and obvious, there being no dou	<b>bt</b> as <i>what</i> to do.
3. BNC3: No doubt there are many, but I would like to single out just the	hree.
4. BNC4: The Japanese claim, first, that because whaling is uncertain	the benefit of the <b>doubt</b> must be given to the whalers.
66: dozen (dízən)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: Instead, there are <b>dozens</b> of high-level networks, which agree	
2. BNC2: The organisation wants to increase its investments at the ra	
3. BNC3: As you <i>can</i> see, there are <b>dozens</b> of things that we <i>can</i> do.	
4. BNC4: Many operations deal with <b>dozens</b> or more suppliers when c	one or two at most could satisfy all needs.
	Appears in Chap(s): 5

71: equip (ɪkwíp)	Appears in Chap(s): 4, 12
······································	Level: 2000
1. Ex1: In order to communicate with each other, these computers are equipp	ed with special communication software.
2. BNC2: One of the problems is that educational establishments <i>can</i> 't renew	their <b>equipment</b> as often as desirable.
3. BNC3: Insist on a demonstration if you're unsure how to operate the equipr	ment.
4. BNC4: Disposal of existing equipment at the agreed prices had been confir	rmed.
72: escape (ɪskéɪp)	Appears in Chap(s): 2
	Level: 2000
1. Ex1: Unfortunately, there was not enough time for everyone to escape.	
2. Ex2: They go to the mountains or to the seashore to escape the city noise a	and heat.
3. BNC3: To abort a <i>command</i> tap <b>Esc</b> for Escape to re-enter the window.	
4. BNC4: This enables particles and radiation to get out through the event hor	rizon and <b>escape</b> from the <i>black</i> hole.
73: essential (ɪsénʃəl)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: The speech they produce is called "telegraphic" speech because the t	babies omit all but the most <b>essential</b> words.
2. BNC2: If the Institute really wanted to lead in Europe, the Modular System	was <b>essential</b> .
3. BNC3: Specific measures therefore are essentially directed at managemen	nt to improve the quality of cleaning staff.
4. BNC4: Before such restorations take place, it is essential that the remains of	of the structures are fully recorded.
74: example (ɪgzǽmpəl)	Appears in Chap(s): 5, 8, 12, 15
	Level: 1000

78: fast (fæst)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: This is the same way that information is sent over the Internet using the <b>faster</b> !	network of routers, but of course it happens much, much
2. BNC2: If they flow too <i>slowly</i> or too <b>fast</b> , deposits can be left behind.	
3. BNC3: One way is to realize that the uncertainty principle allows particles to a	trave/faster than light for a short distance.
4. BNC4: Technological developments have been at a <b>fast</b> pace since the 1950	S.
79: father (fóðs)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: For example, if a baby holds up an empty juice cup and says "juice," to Daddy" or "May I have more juice, Daddy?"	his <b>father</b> , the baby seems to be saying, "I want more juice,
2. BNC2: She transfers her affections, hitherto directed to her mother who has a	cared for her so far in life, on to her <b>father</b> .
3. BNC3: She was very excited by the stickers and would tell her father when her	e came home from work.
4. BNC4: Ideally, both father and son should attend so that they could discuss f	rom a common base.
80: file (fáɪl)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: The data, or information, in an e-mail message, a Web page, or a <b>file</b> is	first broken down into tiny packets.
2. BNC2: Select the <b>file</b> to be <i>loaded</i> using the direction keys.	
3. BNC3: Electronic filing would require very large storage capacities for maps a	and technical drawings.
4. BNC4: If you are successful the file copy will hopefully be written in a previou	sly unused part of the disk.
81: final (fáɪnəl)	Appears in Chap(s): 4, 13, 15
	Level: 1000
1. Ex1: Finally, when all the packets reach their destination, they are put back ir	nto the correct order.
2. BNC2: This Rate will be based on the total loss of height from the final turn, o	or <b>final</b> approach fix, to 0ft at the threshold.
3. BNC3: At press time, it was said to be still finalising international agreements	i.
4. BNC4: Finally, confirm that the details are correct and that you wish to reserv	e the module name, and press the RETURN key.
82: fly (fláɪ)	Appears in Chap(s): 2, 15
	Level: 1000
1. Ex1: Rock and ash <b>flew</b> through the air.	
2. BNC2: Some of them have not handled light aircraft since they learned to fly,	which <i>can</i> be as much as twenty years earlier.
3. BNC3: Now imagine that you open your eyes and you can see a bird flying the	nrough the sky.
4. BNC4: First <b>flown</b> in November 1960, it served the unit from January 1961.	
83: food (fúd)	Appears in Chap(s): 5, 13, 15
	Level: 1000
1. Ex1: These words are usually the names of things that are in the baby's envir	
2. BNC2: All you need is to give them a regular <i>supply</i> of <b>food</b> and water.	- · · · · · · · · · · · · · · · · · · ·
3. BNC3: The patient returned to <i>eating</i> only <b>foods</b> that had been shown to be s	safe.
4. BNC4: No oral <b>food</b> or fluids were allowed during the trial.	
84: foot (fút)	Appears in Chap(s): 2
	Level: 1000
1. Ex1: The city of Pompeii was at the <b>foot</b> of Mt. Vesuvius.	
2. BNC2: She has rather long arms with slightly curved fingers, short <i>legs</i> and b	proad <b>feet</b> .
3. BNC3: If the user has not yet assessed the DC, a message to this effect will I	be <i>displayed</i> at the <b>foot</b> of the page.

Level: 1000         I. Ex1: The city of Pompeii was buried and forgotten for 1,700 years.         2. BNC2: Once it's down in black and white, you know you carl forget its oyou carl put it out of your mind until the next day.         3. BNC3: Inelaized that I had completely forgotten what he sounded like.         4. BNC4: The technique was known in Europe in classical times but was forgotten.         86: form (f:Jim)       Appears in Chap(6): 4, 5, 14         1. Ex1: A hierarchy of networks is formed.         2. BNC3: You can obtain further information and an application form from the address given below.         3. BNC3: if one can discover which protein is missing, then one has a clue to its necessary role in memory formation.         4. BNC4: This user also distributes the appropriate software performance and status report forms.         87: fortune (f:Jifjen)       Appears in Chap(6): 2, 12, 15         1. Ex1: Unfortunately, there was not enough time for everyone to escape.       Ewei: 1000         2. BNC2: Fortunately parents can do a lot to tone down the aggressive behaviour.       BS         3. BNC3: The top ten largest information services companies reporter mixed fortures.       Ewei: 2000         1. Ex1: Unfortunately, there dort seem to be many around in the universe.       BS: fraction (fizik/fon)         2. BNC3: The top ten largest information services companies reporter mixed fortures.       Ewei: 2000         1. Ex1: How does information that leaves one computer travel through all of these networ		Appears in Chap(s): 2
	85: Torget (T3get)	
2. BNG2: Once it's down in black and white, you know you <i>carl</i> <b>forget</b> it so you <i>can</i> put it out of your mind until the next day. 3. BNG3: I realized that 1 had completely <b>forgoten</b> <i>what</i> he sounded like. 4. BNC4: The technique was known in Europe in classical times but was <b>forgoten</b> . <b>Appears in Chap(s): 4, 5, 14</b> Level: 1000 1. Ex1: A hierarchy of networks is <b>formed</b> . 3. BNC3: If one can discover which protein is missing, then one has a clue to its necessary role in <i>memory</i> <b>formation</b> . 4. BNC4: The technique was not enough time for everyone to escape. <b>BNC5:</b> You can obtain further <i>information</i> and an application <b>form</b> from the address given below. 3. BNC3: If one can discover which protein is missing, then one has a clue to its necessary role in <i>memory</i> <b>formation</b> . 4. BNC4: This user also distributes the appropriate software performance and slatus <i>raport</i> <b>forms</b> . <b>B7: fortune (f5.tfjen) Appears in Chap(s): 2, 12, 15</b> Level: 1000 1. Ex1: <b>Unfortunately</b> , here was not enough time for everyone to escape. 3. BNC3: The tore largest information services companies <i>raported</i> mixed <b>fortunes</b> . 4. BNC4: <b>Unfortunately</b> , there <i>dorft</i> seem to be many around in the universe. <b>B8: fraction (f1.fdsk[en) Appears in Chap(s): 4</b> Level: 2000 1. Ex1: How does information that leaves one computer travel through all of these networks, and arrive at its destination, another computer, in a <b>fraction</b> of a second? 2. BNC3: The <b>fraction</b> <i>arrb</i> erpresented as a signed number by any of the methods discussed in the previous section. 3. BNC3: It this case, only a <b>fraction</b> of the words from any sub-list need to be searched to find the best match. 4. BNC4: Any finding point number with a zero <b>fraction</b> represents zero. <b>B9: friend (f1.fdxf) Appears in Chap(s): 4. 8</b> Level: 1000 1. Ex1: You would also need to number the postcards so that your <b>finde</b> could put them in the correct order after he receives the postcards. 3. BNC3: The top case infinemation parents because some behaviours are seen to get worse for a	1 Ev1: The city of Pompeii was buried and <b>forgetten</b> for 1 700 years	Level. 1000
3. BNC3: I realized that I had completely <b>forgotten</b> <i>what</i> he sounded like. 4. BNC4: The technique was known in Europe in classical times but was <b>forgotten</b> . <b>86: from (f5,m)</b> 1. Ext: A hierarchy of networks is <b>formed</b> . 2. BNC2: You can obtain further <i>information</i> and an application <b>form</b> from the address given below. 3. BNC3: If one can discover which protein is missing, then one has a clue to its necessary role in <i>memory</i> <b>formation</b> . 4. Level: 1000         1. Ex1: For example, children often say such things as "I goed to bed" instead of "I went to bed," or "I eated ice cream" instead of "I ate ice cream."         2. Ex2: All the packets might take the same route or they might all go different routes.         3. BNC3: Some learn in this way for the first time about what goes on inside a university.	4. BNC4: He would inevitably be <b>frightened</b> by the experience, because he would	know that he cannot yet expect to walk safely.
Level: 1000         1. Ex1: For example, children often say such things as "I goed to bed" instead of "I went to bed," or "I eated ice cream" instead of "I ate ice cream."         2. Ex2: All the packets might take the same route or they might all go different routes.         3. BNC3: Some learn in this way for the first time about what goes on inside a university.	91· ao (aóx)	Appears in Chap(s): 2, 4, 5, 8, 12, 14, 15
<ol> <li>Ex1: For example, children often say such things as "I goed to bed" instead of "I went to bed," or "I eated ice cream" instead of "I ate ice cream."</li> <li>Ex2: All the packets might take the same route or they might all go different routes.</li> <li>BNC3: Some learn in this way for the first time about <i>what</i> goes on inside a university.</li> </ol>	51. go (goo)	
<ol> <li>Ex2: All the packets might take the same route or they might all <b>go</b> different routes.</li> <li>BNC3: Some learn in this way for the first time about <i>what</i> goes on inside a university.</li> </ol>		
3. BNC3: Some learn in this way for the first time about <i>what</i> <b>goes</b> on inside a university.		utes.

92: happen (hźpən)	Appears in Chap(s): 4, 12, 13
	Level: 1000
<ol> <li>Ex1: This is the same way that information is sent over the Internet using th faster!</li> </ol>	e network of routers, but of course it <b>happens</b> much, much
2. BNC2: Some parents immediately separate the children and punish both whether the children and punch bother the children and	nen they do not know <i>what</i> has <b>happened</b> .
3. BNC3: I was suffering from diphtheria, most of the adult staff were women, a	and nobody was explaining <i>what</i> was <b>happening</b> to me.
4. BNC4: The parent needs to learn to present food to the child and then not p	ay attention to what happens.
93: happy (hǽpi)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: At this stage, babies start to make cooing noises when they are happy	
2. BNC2: Happy Chip works by telling the drive to run at twice its design speed	J.
3. BNC3: The fact that <b>unhappy</b> feelings are pushed away with food is an avoi	dance style of coping with stress.
4. BNC4: She became very <b>unhappy</b> but could not <i>express</i> these feelings.	
94: heat (hít)	Appears in Chap(s): 2
or. near (my	Level: 1000
1. Ex1: They go to the mountains or to the seashore to escape the city noise a	ind heat.
2. BNC2: If people cannot <b>heat</b> <i>water</i> in winter, they will not wash.	
3. BNC3: The <i>water</i> is <b>heated</b> at night and, if not used, stays hot during the da	у.
4. BNC4: There is no ideal <i>system</i> of central <b>heating</b> , and life would be so muc	ch simpler if there were.
95: help (hélp)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: To help you understand this process, I'm going to ask you to think of th	nese packets of information as electronic postcards.
2. BNC2: <i>Information</i> to help top management make these decisions could be	· · ·
3. BNC3: FOUR stamps which go on sale today celebrate the invention which	
4. BNC4: Idea tree <b>helps</b> you <i>organise</i> your thoughts using this process.	•
96: high (háɪ)	Appears in Chap(s): 2, 4
	Level: 1000
1. Ex1: Instead, there are dozens of high-level networks, which agree to connect	ect with each other.
2. BNC2: To read in such a small bar code successfully requires a very high a	legree of resolution.
3. BNC3: But you should descend at a <b>higher</b> rate so as to reach 2500ft before	e you turn.
4. BNC4: Real-time <i>performance</i> is the <b>highest</b> available from general purpose	
97: history (híst3i)	Appears in Chap(s): 2, 14, 15

08. hold (háuld)	Appears in Chap(s): 5, 7
98: hold (hóʊld)	Level: 1000
1. Ex1: For example, if a baby <b>holds</b> up an empty juice cup and says "juice," to Daddy" or "May I have more juice, Daddy?"	
2. BNC2: The last <i>meeting</i> was <b>held</b> on Oki premises a few weeks ago with or	ly a few friends of the family in attendance.
3. BNC3: The answer is they can't, not if our normal ideas of space and time <b>h</b>	
4. BNC4: The simplest form of index is one that holds the address of every rec	

99: home (hóʊm)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: For example, a baby in an English speaking <b>home</b> may say "bal	pa" for the word "bottle" or "kiki" for "cat."
<ol><li>Ex2: For example, the babbling of a baby in a Chinese?speaking hor speaking home.</li></ol>	<b>ne</b> sounds different from the babbling of a baby in an English
3. BNC3: These kits really are a must for any <b>home</b> <i>medicine</i> cabinet.	
4. BNC4: As very few records will not be on their home tracks, this proc	edure is extremely efficient.
100: hunger (hʎŋgз)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: This crying lets their parents know when they are hungry, or unl	nappy, or uncomfortable.
2. BNC2: While these theories address the problem of hunger, they do	so only indirectly.
3. BNC3: They are poor and often hungry but they shared what they ha	d with us.
4. BNC4: I would guess that most of you will have a meal this evening, I	but you are quite free to choose to go to bed <b>hungry</b> .
101: ice (áɪs)	Appears in Chap(s): 5, 12
101.100 (d10)	Level: 2000
1. Ex1: For example, children often say such things as "I goed to bed" ir	nstead of "I went to bed," or "I eated <b>ice</b> cream" instead of "I ate <b>ice</b>
cream."	
2. BNC2: One theory is that they were carried by ice sheets.	
3. BNC3: Silently, watching the proceedings from the walls were portrait	ts of a host of 19th century presidents of the ICE.
4. BNC4: It is this open structure which makes ice less dense than wate	r, and accounts for the fact that it floats.
102: imagine (ɪmæʤən)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Imagine that you want to send a friend a book, but you can send	t it only as postcards.
2. BNC2: I think that <b>imaginary</b> time will <i>come</i> to seem as natural as a re	ound earth does now.
3. BNC3: Once you can do this successfully, you can never again claim	that you have a poor <i>visual</i> <b>imagination</b> .
4. BNC4: Most people still <b>imagine</b> that all <i>cats</i> cover their droppings, bu	ut this is not so.
103: individual (ìndəvídʒəwəl)	Appears in Chap(s): 4, 5, 14
	Level: 1000
1. Ex1: An Internet Service Provider, or ISP, is a company that provides for a monthly charge.	Internet service to <b>individuals</b> , <i>organizations</i> , or companies, usuall
2. Ex2: Some verbs like "eat" are irregular, and the past tense forms for	rirregular verbs must be learned <b>individually</b> .
3. BNC3: The World Health Organisation has called for individual develo	oping countries to commit themselves to decade programmes.
4. BNC4: Today, membership is open to all individuals or organisations	who share the aims of the Society.
104: inform (mfáum)	Appears in Chap(s): 4
104: inform (Infólm)	Level: 1000

cream."	to <i>concentrate</i> on further abstract programming
<ol> <li>Ex1: For example, children often say such things as "I goed to bed" in cream."</li> <li>BNC2: They lose all interest in the initial problem and prefer, instead,</li> <li>BNC3: Instead, he claimed they were incorporating them as part of a</li> </ol>	

106: instruct (Instiákt)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: To connect to the Internet, the user instructs the computer's communication	on software to contact the Internet Service Provider, or IS
2. BNC2: An example of a three- <i>address</i> instruction format on an early computer	is shown in Figure 3.6.
3. BNC3: For senior posts it <i>can</i> be <b>instructive</b> to do the opposite to see how far th	ne candidate <i>can</i> cope with the stress.
4. BNC4: This is to ensure that instructors can modify while retaining the general	path.
107: involve (ɪnvɒ́lv)	Appears in Chap(s): 5, 14
	Level: 1000
1. Ex1: Now, think about some of the similarities and differences <b>involved</b> in the $ ho$	processes of child and adult language learning.
2. BNC2: <i>How</i> much cash is <b>involved</b> is being treated as commercial secret.	
3. BNC3: We do this through our <b>involvement</b> with various <i>industry</i> -sponsored org	ganisations throughout the world.
4. BNC4: The first stage of the current system involves the process of character re	ecognition.
108: job (ʤób)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Routers are specialized computers whose job is to direct the information the	hrough the networks.
2. BNC2: This refers to job rather than employing <i>industry</i> but is very long and cor	mplicated owing to world-wide coverage.
3. BNC3: Neither man went into any detailed argument about how robots will crea	ite <b>jobs</b> .
4. BNC4: At the same time, other aspects of the <b>job</b> had changed completely.	
109: juice (ʤús)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: This word " <b>juice</b> " is really a one?word sentence.	
2. BNC2: One of the first tasks of the day was for the girls to prepare <i>freshly</i> sque	ezed orange <b>juice</b> .
3. BNC3: For example, your press pack on the new juicy apple should without fail	find its way to the offices of The Grocer.
-	
110: kind (káɪnd)	Appears in Chap(s): 5, 8, 10, 14, 15
	Level: 1000
1. Ex1: They begin to use a <b>kind</b> of grammar to put these words together.	
2. Ex2: Babies all over the world begin to babble around the same age, and they a	all begin to make the same <b>kinds</b> of babbling noises.
3. BNC3: He immediately realized that this was a most unusual kind of cat and sta	arted a breeding programme.
	ont has been doing tasks and bousework
4. BNC4: You may have to organize different kinds of help in the home, if the patie	ent has been doing tasks and housework.
4. BNC4: You may have to <i>organize</i> different <b>kinds</b> of help in the home, if the patie 111: know (ირვ)	Appears in Chap(s): 4, 5, 7, 8, 13, 14, 15
4. BNC4: You may have to <i>organize</i> different <b>kinds</b> of help in the home, if the patie 111: know (nόυ)

113: large (المامع)	Appears in Chap(s): 2, 4, 7, 10, 12, 13, 14, 15
	Level: 1000
1. Ex1: It was a very <b>large</b> dark cloud.	
2. Ex2: Local ISPs connect to <b>larger</b> ISPs, which in turn connect to even <b>la</b>	arger ISPs.
3. BNC3: Development of the Contexts Box began in 1990 and a <b>large</b> <i>nu</i> .	mber of schools assisted in its evaluation.
4. BNC4: Such a fluid working arrangement cannot be expected to work in	a <b>larger</b> <i>industrial</i> firm.
114: last (læst)	Appears in Chap(s): 2, 10, 12, 13, 14
	Level: 1000
1. Ex1: The eruption <b>lasted</b> for about three days.	
2. BNC2: The well-organised firm does not just look at <b>last</b> year and add te	en per cent.
3. BNC3: Phase 1 started in July 1980 and lasted 3 years, during which 2.	5 million households were visited.
4. BNC4: Unfortunately improvement was short-lived, lasting only a few w	eeks in those with more severe forms of the disease.
115: late (léɪt)	Appears in Chap(s): 2, 12, 15
	Level: 1000
1. Ex1: In the year 79 C.E., a young Roman boy who later became a very	famous Roman historian was visiting his uncle in Pompeii.
2. BNC2: Samples should be out <b>late</b> this <i>month</i> or early next.	
3. BNC3: This means that it will be approximately one-thirtieth in a differen	t position 24 hours later.
4. BNC4: But little of the latest technology makes its way into ordinary hon	nes and businesses.
116: learn (lśn)	Appears in Chap(s): 5, 8
	Level: 1000
1. Ex1: The difference <i>can</i> be <b>learned</b> over time by observing and interaction	
2. Ex2: The children then continue to <b>learn</b> other grammatical structures in	
3. BNC3: Parents <i>can</i> also <b>learn</b> to anticipate which situations are likely to	· · · · · · · · · · · · · · · · · · ·
4. BNC4: This is easier to learn and <i>can</i> be <b>learnt</b> at a young age.

122: live (láɪv)	Appears in Chap(s): 2, 7, 12, 15
	Level: 1000
1. Ex1: <i>Today</i> many people who <b>live</b> in large metropolitan areas such as Par	ris and New York leave the city in the summer.
2. Ex2: Tidal waves have taken many human <b>lives</b> in the <i>past</i> .	
3. BNC3: But we cannot <i>expect</i> to <b>live</b> on this inheritance for ever.	
4. BNC4: The answer is that, for many of us, the <i>cat</i> has become a <b>living</b> toy	/ rather than a real animal.
123: local (lóʊkəl)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Local ISPs connect to larger ISPs, which in turn connect to even large	ger ISPs.
2. BNC2: These include not only central and <b>local</b> government but also majo	or utility companies and transport suppliers.
3. BNC3: For most people and jobs the whole process takes place within a l	ocalised community.
4. BNC4: In some instances the idea may be implemented by the local peop	ole from locally found, inexpensive raw materials.
124: locate (lóʊkèɪt)	Appears in Chap(s): 2
	Level: 2000
1. Ex1: Pompeii was a beautiful city; it was located on the ocean, on the Bay	y on Naples.
2. BNC2: The chain is followed until the desired record is located or the end	of the chain is reached.
3. BNC3: This is called full indexing and provides a very rapid means of loca	ating any given <i>record</i> .
4. BNC4: In order to store or retrieve information we must have some means	s by which the computer can <i>refer</i> to any <b>location</b> .
125: look (lúk)	Appears in Chap(s): 2, 4, 15
	Level: 1000
1. Ex1: Along the way, many postal agents may <b>look</b> at the addresses on the to reach their destination.	e postcards in order to decide the best route to send them off on
2. BNC2: The well-organised firm does not just look at last year and add ten	per cent.
3. BNC3: We have again looked hard at our working practices and cost base	e and have made substantial changes.
4. BNC4: This is why as early as 1973, we prepared a general plant siting so	cheme looking forward to 1985.
126: lot (lót)	Appears in Chap(s): 4, 5
	Level: 1000
1. Ex1: They also begin to overgeneralize this new grammar rule and make	
<ol> <li>Ex2: This hierarchy is something like a pyramid, with lots of small network pyramid.</li> </ol>	
3. BNC3: Fortunately parents <i>can</i> do a <b>lot</b> to tone down the aggressive beha	aviour.
4. BNC4: The driving system, then, is crucial in making a program that will b	e effective in the hands of a <b>lot</b> of teachers.

4. BNC4: The driving system, then, is crucial in making a program that will be effective in the hands of a lot of teachers.

127: luck (lák)	Appears in Chap(s): 2, 12
	Level: 1000
1. Ex1: These <b>unlucky</b> <i>people</i> were buried alive under the volcanic ash.	
2. BNC2: Luckily for us simple folk the game plot is very straight forward.	
3. BNC3: Elaine gets a lot more help than many disabled people, and some woul	d say she is <b>lucky</b> not to be in residential care.
4. BNC4: So a cat entering your house and being welcomed there gave you the g	good <b>luck</b> of having the Devil on your side.
128: mail (méɪl)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: The data, or <i>information</i> , in an e- <b>mail</b> message, a Web page, or a file is fi	rst broken down into tiny packets.
2. Ex2: After completing these steps, you would put all the postcards in the mail.	
3. BNC3: If the entry is <i>blank</i> , the <b>mail</b> message has not been inspected previous	ily.
4. BNC4: The purpose built mailing system will generally be easier to get started.	
129: make (méɪk)	Appears in Chap(s): 5, 7, 8, 14, 15
	Level: 1000
1. Ex1: At this stage, babies start to <b>make</b> cooing noises when they are happy.	
2. Ex2: They also begin to overgeneralize this new grammar rule and make a lot	of grammar mistakes.
3. BNC3: FOUR stamps which go on sale today celebrate the invention which he	lped to <b>make</b> Britain ruler of the waves.
4. BNC4: The moral of the whole story is that you really do have to take the respo	onsibility for <b>making</b> the <i>choice</i> of PC yourself.
130: many (méni)	Appears in Chap(s): 2, 4, 5, 7, 10, 12, 13, 14, 15
	Level: 1000
1. Ex1: Today many people who live in large metropolitan areas such as Paris an	d New York leave the city in the summer.
2. Ex2: Over 2,000 years ago, <b>many</b> rich Romans did the same thing.	
3. BNC3: It should also be noted that <b>many</b> of these <i>issues</i> have not greatly exer	cised the academic community in this country.
4. BNC4: The computer then displays question and answer like text on many phil	losophical topics.
131: matter (mæt3)	Appears in Chap(s): 4, 12
	Level: 1000
1. Ex1: It is through this process that everyone on the Internet is able to connect she is in the world.	with everyone else on the Internet, no matter where he or
2. BNC2: Second, addition of records to the file is <i>no</i> longer a <b>matter</b> of adding to	the end of the file.
3. BNC3: Not energy but, drawing on the then equally new computer sciences, in	formation was what mattered.
4. BNC4: What matters is that they find the system simple to use and it certainly	simplifies the practitioner's lot.
132: maybe (méɪbi)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Was it "mama" or <b>maybe</b> "papa"?	
2. BNC2: Flight-weight <b>maybe</b> , but they never <i>really</i> took off in British homes.	
3. BNC3: Maybe they are aware of our existence but don't want to reveal themse	lves to us.
4. BNC4: Maybe they flew past each other and started to move away from each o	other.
133: mean (mín)	Appears in Chap(s): 5, 8, 10
	Level: 1000
1. Ex1: Let me give you a couple of examples of <i>what</i> I <b>mean</b> .	
2. Ex2: An English speaking child might say something like "Daddy, up" which ac	tually could <b>mean</b> "Daddy, pick me up, please."
3. BNC3: So, let's look at some of the settings in Windows 3.1 and what they me	an.
4. BNC4: Negative reinforcement does not necessarily mean the threat of physic	al nunishment

121; magazara (mázart)	Appears in Chap(s): 4
134: message (mésədz)	Level: 2000
1. Ex1: The data, or information, in an e-mail <b>message</b> , a Web page, or a file is first	
2. BNC2: For example, will load the string" This is a test <b>message</b> " followed <i>by</i> a ca	
3. BNC3: Information and <b>messages</b> are also returned <i>by</i> way of these interfaces.	
4. BNC4: In each case an explanation of the <b>messages</b> is given.	
135: minute (mínət)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Think about the process for a <b>minute</b> .	
2. BNC2: We hope to be able to tell within <b>minutes</b> what time the rain will start and a	cease over a wide area around London.
<ol> <li>BNC3: But in fact readers can adapt to shortened spelling within minutes regardl</li> </ol>	
4. BNC4: To try to convince us that anyone can use a computer within 5 minutes, A	`
136: mistake (mɪstéɪk)	Appears in Chap(s): 5
130. IIISlake (IIISleik)	Level: 2000
1. Ex1: They also begin to overgeneralize this new grammar rule and make a lot of	
2. BNC2: If you have made a <b>mistake</b> , you <i>can</i> recover your old program by typing	-
3. BNC3: Doctors are the only people who <i>can</i> bury their <b>mistakes</b> and all that.	
4. BNC4: Investigators at the scene concluded that the <i>airplane</i> was <b>unmistakably</b> i	n level flight when it hit.
	Appears in Chap(s): 5, 12
137: moment (móʊmənt)	Level: 1000
<ol> <li>Ex1: I know that you all are trying to develop a second language, but for a mome</li> </ol>	
their first language.	
2. BNC2: Please do not <i>wait</i> until the last <b>moment</b> to inform us.	
3. BNC3: You never get a moment for yourself because you never take a break fror	n the children.
4. BNC4: In the past, when you have approached that person, you felt you had chose	sen the wrong <b>moment</b> .
138: month (mʎnθ)	Appears in Chap(s): 4, 5, 13
	Level: 1000
1. Ex1: In the next <i>few</i> <b>months</b> , babies will acquire a lot of words.	
2. Ex2: Then, around four <b>months</b> of age they begin to babble.	
3. BNC3: There are reckoned to be about 2,000 UK publishers who bring out at least	st one book during any given <i>six</i> <b>month</b> period.
4. BNC4: <i>Twelve</i> months ago when Graeme joined us I had hoped that we could generate enough business to justify an extra man.	
139: mother (mλð3)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: The children begin to say things such as "I walked home" and "I kissed Mon	nmy."
2. BNC2: She never did what her mother asked of her although she was good for her	er father.
3. BNC3: There has been a trend over recent years for professionals to advise mot	hers not to toilet train their children early.
4. BNC4: She transfers her affections, hitherto directed to her mother who has care	d for her so far in life, on to her father.
140: mountain (máʊntən)	Appears in Chap(s): 2
	Level: 2000
1. Ex1: They go to the <b>mountains</b> or to the seashore to escape the city noise and he	
2. BNC2: They are usually <b>mountainous</b> or isolated, making communications difficu	
3. BNC3: Moving from the foot of a high <b>mountain</b> to its peak is very like travelling fi	· · · · · · · · · · · · · · · · · · ·
4 BNC4: The northern and central <b>mountain</b> routes also had serious problems	· · ·

4. BNC4: The northern and central mountain routes also had serious problems.

141: move (múv)	Appears in Chap(s): 4, 7
	Level: 1000
1. Ex1: This hierarchy is something like a pyramid, with lots of small networks a pyramid.	at the bottom, and fewer but larger networks <b>moving</b> up the
2. BNC2: The use of keys to move between fields is fully described in Section 2	2 and summarised in Appendix A.
3. BNC3: You can see <i>how</i> the connector lines stay attached as the box is <b>mov</b>	ved and how automatic guidelines make alignment easy.
4. BNC4: The subject's replies were recorded on tape, whilst moves made duri	ng the program runs were stored in a data file.
142: name (néɪm)	Appears in Chap(s): 2, 5
	Level: 1000
1. Ex1: The boy's <b>name</b> was Pliny the Younger.	
2. BNC2: This page allows you to <i>specify</i> the <b>name</b> of the package to be prepa	red.
3. BNC3: This effect is traced in part to the special status afforded to characters	s which are introduced through proper names.
4. BNC4: You should check the spelling and enter an existing module <b>name</b> .	
143: need (níd)	Appears in Chap(s): 4, 12, 14, 15
	Level: 1000
1. Ex1: Next, you would <b>need</b> to write your <i>address</i> and the <i>address</i> of your frie	end on each of these postcards.
2. Ex2: You would also <b>need</b> to number the postcards so that your friend could	put them in the correct order after he receives the postcards
3. BNC3: Organisations will need to collect information and maintain records fo	r a range of internal management purposes.
<ol> <li>BNC4: It attempts, in some measure, to meet the learning needs of people or</li> </ol>	
144: new (nú)	Appears in Chap(s): 2, 5, 12, 13, 14, 15
	Level: 1000
1. Ex1: Today many people who live in large metropolitan areas such as Paris	and <b>New</b> <i>York</i> leave the city in the summer.
2. Ex2: They also begin to overgeneralize this <b>new</b> grammar rule and make a lo	ot of grammar mistakes.
3. BNC3: No pricing was available on any of the <b>new</b> products.	
4. BNC4: The Government needs to follow a much more aggressive programm	e to promote renewable technologies.
145: noise (n(iz)	Appears in Chap(s): 2, 5
	Level: 2000
1. Ex1: At this stage, babies start to make cooing <b>noises</b> when they are happy.	
2. Ex2: They go to the mountains or to the seashore to escape the city <b>noise</b> ar	nd heat.
3. BNC3: For a single guard it is often wiser to use your knife as any noise can	alert many more enemies including guard dogs.
4. BNC4: At the higher levels, humans in the prime of life <i>can</i> hear <b>noises</b> up to	about 20,000 cycles per second.
146: normal (nóɹməl)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Anyhow, these mistakes are <b>normal</b> , and the children will soon learn to	use the past tense for regular and irregular verbs correctly.
2. BNC2: However, much of the database literature discusses further levels of I	normalisation.
3. BNC3: Read it silently at your <b>normal</b> <i>speed</i> , timing yourself to see just how	long you take.
4. BNC4: Subject headings lists are normally generated for a particular purpose	9.
147: now (náʊ)	Appears in Chap(s): 5, 12
	Level: 1000
1. Ex1: Now, think about some of the similarities and differences involved in the	e processes of child and adult language learning.
<ol> <li>Ex1: Now, think about some of the similarities and differences involved in the</li> <li>BNC2: Quotations are now being sought for the production of the 1993 maga</li> <li>BNC3: <i>Let</i> us turn now to the relationship between the chronic sickness and</li> </ol>	azines.

148: number (n⁄imbȝ)	Appears in Chap(s): 4, 12
	Level: 1000
1. Ex1: You would also need to <b>number</b> the postcards so that your friend could p	ut them in the correct order after he receives the postcards.
2. BNC2: This column allows the issue number of the first version of the correspo	onding package to be entered.
3. BNC3: Suppose we <b>numbered</b> all the character <i>positions</i> in the book and we of	could easily move to any character position.
4. BNC4: A total labelling index was calculated as the ratio of labelled <i>cell</i> to tota	l <i>cell</i> <b>numbers</b> for each column.
149: old (óʊld)	Appears in Chap(s): 5, 13
	Level: 1000
1. Ex1: By the time they are ten months <b>old</b> , however, the babbling of babies from	m different language backgrounds sounds different.
2. BNC2: So I just went off quietly to run my bath, a sad and disappointed old ma	an.
3. BNC3: Just because we grow older, it doesn't mean that we are not just as mu	uch in need of comfort from those around us.
4. BNC4: Note that you may only access the <b>oldest</b> 16 <i>mail</i> messages.	
150: order (óɹdȝ)	Appears in Chap(s): 4, 15
	Level: 1000
1. Ex1: You would also need to number the postcards so that your friend could p	ut them in the correct <b>order</b> after he receives the postcards.
2. Ex2: But finally, after all of the postcards had arrived, your friend would be able	e to put them back in the correct <b>order</b> and read the <i>book</i> .
3. BNC3: The various mathematical and logical operators have a <i>priority</i> order.	
4. BNC4: But it is one thing to say that the rich, orderly Swedes can put their ene	ergy house in order with a minimum of CO 2 .
151: organize (ɔ́ɹɡənàɪz)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: An Internet Service Provider, or ISP, is a company that provides Internet for a monthly charge.	
2. BNC2: The <i>World</i> Health <b>Organisation</b> has called for individual developing cou	untries to commit themselves to decade programmes.
3. BNC3: We do this through our involvement with various <i>industry</i> -sponsored or	rganisations throughout the world.
4. BNC4: Local organisers are responsible both for the academic and technical s	• •
152: packet (pækət)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: When a <b>packet</b> reaches a router, the router reads its destination address	
2. Ex2: To help you understand this process, I'm going to ask you to think of thes	se packets of <i>information</i> as electronic postcards.
3. BNC3: Furthermore, the packets were too costly for the average people to buy	y, conflicting with the second criterion.
4. BNC4: That's why the <b>packets</b> have an arrow <i>showing</i> which way up it should	
153: page (péɪʤ)	Appears in Chap(s): 4
Too. page (peros)	Level: 1000
1. Ex1: The data, or information, in an e-mail message, a Web page, or a file is f	irst broken down into tiny packets.
2. BNC2: An example of this index <b>page</b> is shown in figure 11.2.	
3. BNC3: Once you've stuck your shapes and text on the <b>page</b> you <i>can</i> rotate an	nd repeat they to your heart's content.
4. BNC4: However, if the mail message has two or more <b>pages</b> , you <i>can</i> use this	
154: parant (néjant)	Appears in Chap(s): 5, 8
154: parent (pé」ənt)	Level: 1000
1. Ex1: This crying lets their <b>parents</b> know when they are hungry, or unhappy, or	
<ol> <li>Ex2: We also tend to use formal language in conversations with persons we d with, such as professors, bosses, doctors, friends of our <b>parents</b>', strangers, etc. family, and friends, and when we write personal notes or letters to close friends,</li> </ol>	on't know well or with people we have a formal relationship Informal language is used in conversation with colleagues,
3. BNC3: A repeated pattern of interaction between the <b>parent</b> and child <i>can</i> dev	velop.
A RNC4: The first step in treatment is to help <b>parents</b> try to identify <i>what</i> are the	and characteristics of their shild

4. BNC4: The first step in treatment is to help parents try to identify what are the good characteristics of their child.

155: past (pæst)	Appears in Chap(s): 5, 7, 8
	Level: 1000
1. Ex1: Anyhow, these mistakes are normal, and the children will soon learn	n to use the <b>past</b> tense for regular and irregular verbs correctly.
<ol><li>Ex2: In other words, the children have learned the past tense rule for reg they cannot use this rule for all verbs.</li></ol>	ular verbs such as "walk" and "kiss," but they haven't learned that
3. BNC3: In the <b>past</b> , when you have approached that person, you felt you	had chosen the wrong moment.
4. BNC4: However, historical documents are not always true records of the	past.
156: people (pípəl)	Appears in Chap(s): 2, 7, 8, 10, 12, 14, 15
	Level: 1000
1. Ex1: In fact, 18,000 <b>people</b> escaped the terrible disaster.	
2. Ex2: More than 2,000 people died.	
3. BNC3: The town contains about 70,000 people of whom 30,000 have fle	d from other areas.
4. BNC4: However, even if there are some cases of peaceable peoples wh	o rarely feel mutual hostility, they are not easy to find.
157: pick (pík)	Appears in Chap(s): 5, 10, 14
· · · · P···· (P-··)	Level: 1000
1. Ex1: An English speaking child might say something like "Daddy, up" wh	ich actually could mean "Daddy, <b>pick</b> me up, please."
2. BNC2: Even if you have to force yourself you must pick yourself up and o	do something.
3. BNC3: We said we would like to ask her about males and females, and i	t was evident that her interest <b>picked</b> up.
4. BNC4: I have has to <b>pick</b> up <i>what</i> mathematics I know as I went along.	
158: plane (pléɪn)	Appears in Chap(s): 4, 12, 15
···· / ····· /	Level: 2000
1. Ex1: Some might go by truck, some by train, some by plane, some by bo	pat.
2. BNC2: The line will sweep through a <b>plane</b> , and the circles will sweep th	rough spheres.
3. BNC3: Birds, like planes, usually face into the wind, so they do not see the	he <b>plane</b> coming.
4. BNC4: A group of data <b>planes</b> makes up a <i>memory</i> bank.	
159: post (póʊst)	Appears in Chap(s): 4
	Level: 1000
<ol> <li>Ex1: Along the way, many <b>postal</b> agents may look at the addresses on the to reach their destination.</li> </ol>	ne postcards in order to decide the best route to send them off on
2. BNC2: Inside the ticket hall, a team of volunteers were putting up posters	S.
3. BNC3: Run a stringline from the top of the bank to a <b>post</b> set at the foot of	of the bank, checking for square.
4. BNC4: While you are there, register for a free copy of Executive <b>Post</b> , w	hich will be <i>sent</i> to your home.
160: probable (pıóbəbəl)	Appears in Chap(s): 4, 8, 10, 13, 15
	Level: 1000
1. Ex1: The postcards would <b>probably</b> arrive at different times.	
2. Ex2: For example, I might <i>say</i> to a friend or family member, "Close the d would <i>say</i> "Would you mind closing the door?" or "Excuse me, could you pl	
3. BNC3: This allows the map data to be replaced by probability distribution	<i>ns</i> of known form and parameters.
4. BNC4: These accounts contain many references to plants, and probably	the earliest records of the species named.
161: process (puźsès)	Appears in Chap(s): 4, 5
	Level: 1000
4 Fud. The presses demand	
1. Ex1: The <b>process</b> depends on routers.	
<ol> <li>Ex1: The process depends on routers.</li> <li>Ex2: To help you understand this process, I'm going to ask you to think of 3. BNC3: Developing the ability to identify and process <i>plant</i> samples will a</li> </ol>	

162: produce (p.ədús)	Appears in Chap(s): 5, 7
	Level: 1000
1. Ex1: The speech they <b>produce</b> is called "telegraphic" speech because the b	abies omit all but the most essential words.
2. BNC2: It produced 3.8 million tonnes of carbon per year, even with the high	est levels of energy efficiency.
3. BNC3: Typically an object is a producer or consumer of information or an ite	em of <i>information</i> .
4. BNC4: A wide range of information technologies are in use producing subst	antial amounts of data.
163: provide (pJəváɪd)	Appears in Chap(s): 4, 15
	Level: 1000
1. Ex1: An Internet <i>Service</i> <b>Provider</b> , or ISP, is a company that provides Intern for a monthly charge.	et <i>service</i> to individuals, organizations, or companies, usually
<ol><li>Ex2: An Internet Service Provider, or ISP, is a company that provides Intern for a monthly charge.</li></ol>	et <i>service</i> to individuals, organizations, or companies, usually
3. BNC3: Clearly, the combination of low-risk procedures and poor follow-up d	oes not provide useful information.
4. BNC4: A <i>report</i> is then <b>provided</b> on screen to tell you if a virus was found.	
164: quick (kwík)	Appears in Chap(s): 5, 13
	Level: 1000
1. Ex1: If we stop to think about it, actually it's quite amazing <i>how</i> <b>quickly</b> babic similar the process is for babies all over the world.	es and children all over the world learn their language and how
2. BNC2: It makes mixing small quantities <i>easy</i> and <b>quick</b> , and leaves hardly a	ny cleaning up to do.
3. BNC3: Other events may cause the stress tap to <i>turn</i> on much <b>quicker</b> .	
4. BNC4: I think you will be surprised at how much more quickly you can read	while still remaining able to understand the text.
165: quite (kwáɪt)	Appears in Chap(s): 5, 10
,	Level: 1000
<ol> <li>Ex1: If we stop to think about it, actually it's quite amazing how quickly babie similar the process is for babies all over the world.</li> </ol>	es and children all over the world learn their language and how
2. BNC2: Any child who is encouraged to explore these aspects will learn the a	awkward shapes of words <b>quite</b> naturally.
3. BNC3: In some cases, quite new kinds of source material will become pract	ical.
4. BNC4: Moreover, he could recover the known formulas for four, six and eight	nt squares although his method was <b>quite</b> <i>different</i> .
166: reach (ɹíʧ)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: When a packet <b>reaches</b> a router, the router reads its destination addre	SS.
2. Ex2: Finally, when all the packets <b>reach</b> their destination, they are put back	into the correct order.
3. BNC3: Rarely, it seems, is a park committee and farmer unable to <b>reach</b> ag	reement.
4. BNC4: If the <i>limit</i> has been <b>reached</b> , the next sequential instruction is execu	ited.
167: read (Jéd)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: When a packet reaches a router, the router reads its destination addre	SS.
2. Ex2: But finally, after all of the postcards had arrived, your friend would be a	ble to put them back in the correct order and <b>read</b> the <i>book</i> .
3. BNC3: The system allows gas, electricity and water <i>meters</i> to be <b>read</b> .	
4. BNC4: In any event, they are adjusted one way or the other at the next met	er reading.
168: really (Jíli)	Appears in Chap(s): 5, 8, 10 Level: 1000
1. Ex1: This word "juice" is <b>really</b> a one?word sentence.	20101 1000
2. Ex2: But if I were talking to my supervisor or a friend of my parents', I would	probably say "I really enjoy soccer" or "I like soccer very
much."	
much." 3. BNC3: The moral of the whole story is that you <b>really</b> do have to take the re	sponsibility for making the choice of PC vourself.

160: $r_{000}(v_{00}(v))$	Appears in Chap(s): 4

171: relation (ɹiléɪʃən)	Appears in Chap(s): 5, 8, 15
	Level: 1000
1. Ex1: We also tend to use formal language in conversations with persons we don't know well or with people we have a formal <b>relationship</b> with, such as professors, bosses, doctors, friends of our parents', strangers, etc. Informal language is used in conversation with colleagues, family, and friends, and when we write personal notes or letters to close friends, as well as in diaries, etc.	
<ol><li>Ex2: I know that you all are trying to develop a second language, but for a moment their first language.</li></ol>	nt, let's think about a <b>related</b> topic: <i>How</i> children develop
3. BNC3: Other <i>issues</i> relate to investigating how this uncertainty information can best be presented to the user.	
4. BNC4: Let us turn now to the <b>relationship</b> between the chronic sickness and mort	ality rates.
172: remember (JIMémb3)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: Do you remember anything about how you learned your first language during	g the early years of your life?
2. Ex2: <i>Can</i> you <b>remember</b> the first word you learned in English?	
3. BNC3: Remember all your happy times, be creative and do all those things you p	romised each other you would do together.
4. BNC4: I can remember looking forward to her arrival so that there would be three	of us to play games.
173: rich (ɹítʃ)	Appears in Chap(s): 2, 12
rio. non (arg)	Level: 2000
1. Ex1: Over 2,000 years ago, many <b>rich</b> Romans did the same thing.	
2. BNC2: In contrast, <b>rich</b> households, which get wood from their own land, depend	on logs.
3. BNC3: Yet many of these <i>countries</i> are <b>rich</b> in organic and mineral resources.	-
4. BNC4: There was growing evidence, however, that wildlife was safer and richer o	n <i>organically</i> managed lands.
174 rice ( $1677$ )	Appears in Chap(s): 2, 7
174: rise (Járz)	Level: 1000
1. Ex1: This black cloud <b>rose</b> high into the sky.	
<ol> <li>2. BNC2: However the plan also allows for a 36 <i>per</i> cent <b>rise</b> in carbon dioxide emission</li> </ol>	sions from heavy industry and power plants.
3. BNC3: The study suggests that Northern European agriculture could benefit from	
4. BNC4: It was noted that the <i>price</i> -earnings ratios <b>rose</b> significantly as growth rate	· · · · · · · · · · · · · · · · · · ·
	Appears in Chap(s): 2
175: rock (Jók)	Level: 2000
1. Ex1: When the eruption was over, Pompeii was buried under 20 feet of volcanic <b>n</b>	
<ol> <li>2. BNC2: More important, the pores in some rocks are either large or join up so that water can flow through them easily.</li> <li>3. BNC3: The thrust is shown on the map, Fig.7, as also is the wide zone of rocks affected by the movements on the thrust plane.</li> </ol>	
<ol> <li>BNC4: A new rock-store, drawing office, <i>photographic</i> department and some offices were added.</li> </ol>	
T. DINGT. MINEW TOOL STOLE, ALAWING UNDER DIDLOUIDDILL ADDILLITETIL AND SUITE UND	

176: rome (ມວບm)	Appears in Chap(s): 2
、 <i>`</i>	Level: 2000
1. Ex1: Over 2,000 years ago, many rich <b>Romans</b> did the same thing.	
2. Ex2: They left the <i>city</i> of <b>Rome</b> in the summer.	
3. BNC3: Glass can also be drawn into fibres, as the Romans knew, and	today production of glass-fibre is a large industry.
-	
177: route (Jút)	Appears in Chap(s): 4
	Level: 2000
1. Ex1: All the packets might take the same route or they might all go diffe	erent routes.
2. Ex2: All the packets might <i>take</i> the same <b>route</b> or they might all go diffe	erent routes.
3. BNC3: One major issue on which a decision had to be <i>taken</i> was the <b>ro</b>	pute.
<ol> <li>BNC4: They take different routes but employ the same learning principl</li> </ol>	
179: mulo (uúl)	Appears in Chap(s): 5
178: rule (Júl)	Level: 1000
1. Ex1: They also begin to overgeneralize this new grammar <b>rule</b> and mal	
2. Ex2: In other words, the children have learned the past tense <b>rule</b> for re	
they cannot use this <b>rule</b> for all verbs.	
3. BNC3: It is you, having shut the door on your fears which have hitherto	ruled your life, who <i>can</i> open a new door.
4. BNC4: The claim is that these <b>rules </b> can be built up from a simple base.	•
179: say (séı)	Appears in Chap(s): 5, 8, 10, 13, 14, 15
175. Say (Sel)	Level: 1000
1. Ex1: For example, children often <b>say</b> such things as "I goed to bed" ins cream."	tead of "I went to bed," or "I eated ice cream" instead of "I ate ice
2. Ex2: If I'm talking to my friend or colleague I might say "I'm <i>just</i> crazy al	bout soccer!"
3. BNC3: First products are expected early next year and will be marketed	d by both <i>companies</i> , reports <b>say</b> .
4. BNC4: The report says that 40 British rivers are suffering from low wate	er levels as a result of human action.
180: see (sí)	Appears in Chap(s): 2, 5, 10, 12, 15
	Level: 1000
1. Ex1: See you then.	
2. Ex2: <i>What</i> Pliny <b>saw</b> was the eruption the explosion of the volcano, Ves	suvius.
3. BNC3: You can see how the connector lines stay attached as the box is	
4. BNC4: The inaccuracy is possibly due to choosing too high an exposur	e, so that some black <i>cells</i> are <b>seen</b> as white.
191: 000m (ofm)	Appears in Chap(s): 5, 15
181: seem (sím)	Level: 1000
1. Ex1: For example, if a baby holds up an empty juice cup and says "juic Daddy" or "May I have more juice, Daddy?"	
<ol> <li>BNC2: It will come with <i>what</i> may well <b>seem</b> a comprehensive range of</li> </ol>	facilities.
3. BNC3: All around me, children were playing with <i>what</i> seemed like wor	
<ol> <li>BNC4: Yet it still seems to consider that collecting threatened species is</li> </ol>	
	Appears in Chap(s): 4
182: send (sénd)	
1 Evil Imaging that you want to send a friend a back but you are send :	Level: 1000
<ol> <li>Ex1: Imagine that you want to send a friend a book, but you can send in 2. Ex2: This is the same way that <i>information</i> is sent over the Internet usin faster!</li> </ol>	
3. BNC3: Whatever <i>information</i> you can <b>send</b> me to help steer me on to a	path to a more rewarding career would be most appreciated.
4. BNC4: Following this pre-evaluation, it may useful to ask for an inspect	

183: sentence (séntəns)	Appears in Chap(s): 5
	Level: 2000
1. Ex1: The next stage of language acquisition begins around the age of 18 months	when the babies begin to say two word <b>sentences</b> .
2. BNC2: He could understand commands if they were spoken directly and in short	sentences.
3. BNC3: Crew believes you <i>can</i> more easily judge <b>sentence</b> complexity from such	
4. BNC4: I nearly always know what people are going to say and <i>can</i> finish their <b>se</b>	
	Appears in Chap(s): 4
184: service (sávəs)	Level: 1000
1. Ex1: An Internet <b>Service</b> Provider, or ISP, is a company that provides Internet <b>se</b> for a monthly charge.	
2. BNC2: Suggest instructions to control a set of output devices, and extend your in	terrupt service routine accordingly.
3. BNC3: In other words, a topic is included if there is an <i>information</i> centre, source	or <b>service</b> covering it.
4. BNC4: In-service training takes up much time and expense, items in short supply	in <i>schools</i> and school library <b>services</b> .
185: sight (sáɪt)	Appears in Chap(s): 2
loor olgin (ourly	Level: 2000
1. Ex1: He saw a frightening <b>sight</b> .	
2. BNC2: And don't get below your minimum safe height until you are in sight of and	d <i>lined</i> up with your runway.
3. BNC3: Sunday will be kept free for you to <i>enjoy</i> the <b>sights</b> of one of the world's m	nost fascinating cities.
4. BNC4: We all know how <b>unsightly</b> piles of litter <i>look</i> and how they ruin the appea	rance of our towns, beaches and countryside.
186: similar (síməl3)	Appears in Chap(s): 5, 8, 10, 12
	Level: 1000
1. Ex1: Now, think about some of the <b>similarities</b> and differences involved in the pro	ocesses of child and adult language learning.
2. Ex2: If we stop to think about it, actually it's quite amazing how quickly babies an <b>similar</b> the process is for babies all over the world.	d children all over the world learn their language and how
3. BNC3: A similar approach is taken with the grammar used by the METAL machin	e translation system.
4. BNC4: All over the railway system, similarly expensive bridges and tunnels are n	earing collapse.
87: single (síŋgəl) Appears in Chap(s): 4, 15	
	Level: 1000
1. Ex1: But, amazingly, there is no one <b>single</b> controlling network at the top.	
2. BNC2: No doubt there are many, but I would like to <b>single</b> out <i>just</i> three.	
3. BNC3: Secondly, the new research and <i>technology</i> law itself <b>singles</b> out 10 or so	second-priority sectors worthy of attention.
4. BNC4: The first is that, because each <i>record</i> is dealt with <b>singly</b> , the main storage	e work area space requirements are very low.
188: size (sáɪz)	Appears in Chap(s): 4, 10
100. 5126 (5412)	Level: 1000
1. Ex1: First, you would have to cut up each of the pages of the book to the size of	
2. BNC2: It is unusual for a library authority of any <b>size</b> to place all of its orders thro	·
3. BNC3: Presumably there are factors that control the <b>size</b> , and they <i>depend</i> on th	
4. BNC4: This only becomes significant when calculating <i>record</i> sizes for random a	
	Appears in Chap(s): 2, 15
189: sky (skáɪ)	Level: 2000
1. Ex1: This black cloud rose high into the <b>sky</b> .	
2. BNC2: The populations that live on these <b>sky</b> islands are cut off from each other,	and evolve independently.
3. BNC3: An extreme angle is with the sun low in the <b>sky</b> .	
4. BNC4: For example, imagine a television picture, one third of which is <i>showing</i> a	uniformly blue sky.
,	, · · · · <del>· · ·</del> ·

90: small (smól)	Appears in Chap(s): 4, 10, 14
	Level: 1000
1. Ex1: This hierarchy is something like a pyramid, with lots of <b>small</b> networks at pyramid.	the bottom, and fewer but larger networks moving up the
2. BNC2: May be of use if a <b>small</b> chip has <i>come</i> off a bone.	
3. BNC3: Most had been subject to companies' general cost-cutting exercises an	d are now <b>smaller</b> in <i>number</i> and size than formerly.
4. BNC4: Even at the faster rate, it would take over 1300 years simply to count to	the <b>smallest</b> of the above <i>numbers</i> .
191: soon (sún)	Appears in Chap(s): 2, 5
	Level: 1000
1. Ex1: Well, we know babies are able to communicate as <b>soon</b> as they are born	
2. Ex2: Anyhow, these mistakes are normal, and the children <i>will</i> <b>soon</b> learn to us	
3. BNC3: So far, 150 have been tested, and the full statistical results <i>will</i> be avail	able <b>soon</b> .
4. BNC4: <b>Sooner</b> or later you'// come face to face with an evil creature.	
192: sound (sáʊnd)	Appears in Chap(s): 5, 8
	Level: 1000
1. Ex1: By the time they are ten months old, however, the babbling of babies from	
<ol><li>Ex2: For example, the babbling of a baby in a Chinese?speaking home sound speaking home.</li></ol>	<b>s</b> different from the babbling of a baby in an English
3. BNC3: A sound Freedom of Information Act might be the answer to this proble	em.
4. BNC4: This <b>sounds</b> like <i>just</i> what is required to allow space travel through blac	ck holes.
193: speak (spík)	Appears in Chap(s): 5, 8
	Level: 1000
1. Ex1: Well, we know babies are able to communicate as soon as they are born	even before they learn to <b>speak</b> their first language.
2. Ex2: An English <b>speaking</b> child might say something like "Daddy, up" which ac	stually could mean "Daddy, pick me up, please."
3. BNC3: If the way adults act towards a child <i>can</i> have a traumatic effect on the	ir lives, so too <i>can</i> the way they <b>speak</b> .
4. BNC4: The monthly meetings include discussions of Club business, talks by g	uest <b>speakers</b> and vendor presentations.
194: special (spéʃəl)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: Routers are <b>specialized</b> computers whose job is to direct the information	through the networks.
2. BNC2: Inevitably, in a detailed report of this type much of the <i>information</i> is <b>sp</b>	ecialised.
3. BNC3: All the adaptations of the <b>specialist</b> desert <i>plants</i> and animals follow fro	om these requirements.
4. BNC4: The <b>specialists</b> , in turn, provide <i>systems</i> support and technical and cor	sultancy services to local customers.
195: speech (spítʃ)	Appears in Chap(s): 5, 8
·····	Level: 2000
1. Ex1: The <b>speech</b> they produce is called "telegraphic" <b>speech</b> because the bab	ies omit all but the most essential words.
2. BNC2: It should be remembered the situations in which <b>speech</b> is used.	
3. BNC3: Many other parts of the brain are important for normal <b>speech</b> .	
4. BNC4: I have shown that these conditions <i>can</i> apply in <b>speech</b> processing.	
196: spend (spénd)	Appears in Chap(s): 2
	Level: 1000
1. Ex1: Many of these wealthy Romans <b>spent</b> their summers in the city of Pompe	
	ttle money to spend
<ol><li>BNC2: Private finance is unlikely to be attracted to areas where people have li</li></ol>	are meney to opena.
<ol> <li>BNC2: Private finance is unlikely to be attracted to areas where people have li</li> <li>BNC3: Here's an exercise to help you identify <i>how</i> you're <b>spending</b> your time r</li> </ol>	

27: stago (stárdz)	Appears in Chap(s): 5
197: stage (stéidz)	Level: 1000
1. Ex1: At this <b>stage</b> , babies start to make cooing noises when they are happy.	
2. Ex2: The first <b>stage</b> of language acquisition begins a few weeks after birth.	
3. BNC3: The target date should be set against these events and <i>progress</i> monitor	ed at each <b>stage</b>
<ol> <li>BNC4: Sampling might also be carried out <i>progressively</i> involving different stage</li> </ol>	
198: start (stó.t)	Appears in Chap(s): 5 Level: 1000
1. Evil: At this stage, babies <b>start</b> to make seeing poises when they are bappy	Level: 1000
1. Ex1: At this stage, babies <b>start</b> to make cooing noises when they are happy.	nings hawmuch time has passed
2. BNC2: Knowing <i>how</i> much was there to <b>start</b> with and <i>how</i> much remains determ 2. BNC2: It returned even after Latrianed down the task and <b>started</b> again	nines now much time has passed.
3. BNC3: It returned even after I stripped down the tank and <b>started</b> again.	
4. BNC4: A useful <b>starting</b> <i>point</i> for the study of any system is a responsibility chart	
199: step (stép)	Appears in Chap(s): 4
	Level: 1000
1. Ex1: After completing these <b>steps</b> , you would put all the postcards in the mail.	
2. BNC2: To execute most commands it is necessary to move it into the Command	Area as the first <b>step</b> in selecting a <i>command</i> .
3. BNC3: Suppose the delay number stored in the look-up table is m for the maxim	um <b>stepping</b> <i>rate</i> of 500 steps per second.
4. BNC4: To date, however, this had not resulted in major practical steps being tak	en by companies, the survey showed.
200: stop (stóp)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: If we <b>stop</b> to think about it, actually it's quite amazing how quickly babies and children all over the world learn their language and how similar the process is for babies all over the world.	
2. BNC2: It may <b>stop</b> your dream from <i>turning</i> into a nightmare.	
3. BNC3: Those contents were then tipped into a second vessel containing cold wa	ter, which both <b>stopped</b> and cooled the <i>reaction</i> .
4. BNC4: The <i>report</i> warns that <b>stopping</b> the dumping will cost billions of dollars.	
201: structure (stuáktʃɜ)	Appears in Chap(s): 5
	Level: 1000
1. Ex1: The children then continue to learn other grammatical structures in the sam	
2. BNC2: We aimed to produce models with a clear <i>logical</i> structure, without deper	•

1. Ev1: They left the city of Perce in the summer	
1. Ex1: They left the city of Rome in the <b>summer</b> .	Now York loove the situ in the summer
2. Ex2: Today many people who live in large metropolitan areas such as Paris and	
3. BNC3: WEDDING bells have been active <i>during</i> the <b>summer</b> with two of our former National Officers finding a new lease of life.	
4. BNC4: We have cool <b>summers</b> and mild <i>winters</i> with relatively modest seasonal variation.	
203: talk (tók)	Appears in Chap(s): 5, 8
	Level: 1000
1. Ex1: What I'd like to <b>talk</b> to you about today is the topic of child language development.	
2. Ex2: <i>What</i> I'm <b>talking</b> about are two levels of correct English.	
3. BNC3: The client will then <b>talk</b> about <i>what</i> is troubling them.	
4. BNC4: Once installed with the correct settings you can be <b>talking</b> to other computers within minutes.	

204: terrible (té.əbəl)	Appears in Chap(s): 2, 12, 13, 14
	Level: 1000
1. Ex1: In fact, 18,000 <i>people</i> escaped the <b>terrible</b> disaster.	
2. BNC2: For a moment he thought he had been in a <b>terrible</b> accident.	
3. BNC3: The feeling almost wiped out that <b>terrible</b> year as if it hadn't happe	ned at all.
4. BNC4: It's terrible what's happening to him, it really is, the Government of	ught to be ashamed of itself.
205: thing (θíŋ)	Appears in Chap(s): 2, 5, 10, 13, 15
	Level: 1000
1. Ex1: For example, children often say such <b>things</b> as "I goed to bed" instea cream."	ad of "I went to bed," or "I eated ice cream" instead of "I ate ice
2. Ex2: Over 2,000 years ago, many rich Romans did the same <b>thing</b> .	
3. BNC3: The new mother is often terrified of making a mistake but she does	s not really know <i>what</i> is the best <b>thing</b> to do.
4. BNC4: As will so many <b>things</b> , you get <i>what</i> you pay for.	
206: think (θíŋk)	Appears in Chap(s): 4, 5, 14, 15
	Level: 1000
1. Ex1: To help you understand this process, I'm going to ask you to <b>think</b> of	f these packets of information as electronic postcards.
2. Ex2: Now, <b>think</b> about some of the similarities and differences involved in the processes of child and adult language learning.	
3. BNC3: I think that what she really wants is for words to be more like numb	Ders.
4. BNC4: The design problem of which does <i>what</i> is also best <b>thought</b> about	t initially in system terms.
	Appears in Chap(s): 2, 4, 5, 7, 8, 14, 15
207: time (táɪm)	Level: 1000
1. Ex1: The postcards would probably arrive at different <b>times</b> .	
2. Ex2: Unfortunately, there was not enough <b>time</b> for everyone to escape.	
3. BNC3: At the same time, other aspects of the job had changed completely	у.
4. BNC4: Different parts of the lighting system can <i>come</i> on at different <b>time</b>	•
208: tiny (tárni)	Appears in Chap(s): 4
208: tiny (táɪni)	Level: 2000
1. Ex1: The data, or information, in an e-mail message, a Web page, or a file	
2. BNC2: Basic research takes up a <b>tiny</b> percentage of that life sciences bud	
3. BNC3: Many a good behavioural approach sinks without trace because of	-
